H. S. A. Will Hold Harvest Supper

The Carbon Home and School Association met at the School on Tuesday, October 2. The school nurses were to have been present but were unable to attend because of poor road conditions.

It was decided to hold a harvest supper Saturday evening, October 27th. Anyone interested in donating to the supper is asked to contact the convenor, Mrs. S. J. Garrett. Proceeds will go towards purchasing of the J. J. Greenan office for use as the proposed library.

HI-SCHOOL HI-LITES

Did You Know . . . ?

That the girls are in a majority at the High School this year. It's no wonder that competition is great. (You lucky boys). . . that Shirley McMann would like to learn to dance in preparation for the High School Halloween party at Swatwell on October 19. What say, fellows, you can teach her a lot in a week . . . that Lynn McCracken figures she can ride a motorcycle . . . that JoAnn Ohlhauser is just waiting patiently for the day that the principal has a birthday. (Watch out Mr. Appleyard, she has a gang of strong arms mustered, as well as a nice flat board . . . that Lois MacAlpine is lonesome at school this year (Why Lois, you wouldn't go to Edmonton with us) . . . that Jim Foster is seen carrying bookshome every night to do homework. What's happened Jim, are you trying to keep one jump ahead of the teacher?

Coyote Control School Planned for 3 Hills

Coyote control training will be provided in the Municipal District of Kneehill according to W. S. Backman, field supervisor of Kneehill Agricultural Service Board. Mr. William Lobay, supervisor, Crop Protection Service, will conduct a school at the municipal office, Three Hills, on Monday, October 15, at 2 p.m.

Object of the school is to familiarize Area Control Officers and farmers with cyanide "coyote-getters", and the necessary precaution taken in setting up the guns. These include the posting of warning signs in the area and notifying neighbors and local schools of the danger.

October 18 a Holiday

The village council at its last meeting gave third reading to a by-law declaring Thursday, October 18 a Village civic holiday. The holiday was declared to enable business, men and their employees to take in the Royal visit celebration in Calgary on that date. Housewives are advised to stock up the larder in preparation for the holiday.

: **Western Briefs** :**May Postpone Session**

VICTORIA, B.C.—Revision of plans for the Royal visit may force postponement of the special session of the British Columbia legislature. The session was called for Oct. 22 but it now appears that date might clash with the visit of Princess Elizabeth and Prince Philip. The session may be held immediately after the Royal visit.

Signals To Replace Watchmen

PORTAGE LA PRAIRIE.—New crossing signals and gates are to guard Canadian National railways crossings in Portage la Prairie. The Board of Transport Commissioners has ordered the installation of two short arm gates, two flashing light signals and two bells in lieu of the existing watchmen.

Park Area Wanted

BRANDON, Man.—An offer to purchase half of Stanley park in the residential area of Brandon was made by a national merchandizing company.

Pension Plan Approved

SASKATOON.—A pension plan for the non-teaching staff of the University of Saskatchewan has been approved in principle by the board of governors. The plan involves the annual contribution by both the employee and the university of five per cent. of the employee's salary. The pension plan will only apply to staff members retiring at least five years from now.

Offers \$200 Prize

SWIFT CURRENT, Sask.—W. J. McIntyre, president of the Swift Current Civic Voters association, has offered a prize of \$200 to the organiza-

tion in any Saskatchewan city which gets out the biggest vote at the next civic elections.

Forbidden To Drive Car

PORTAGE LA PRAIRIE.—Fred Peters of Lowe Farm, Man., was prohibited from driving an automobile for three years when convicted in police court of reckless driving. The charge was laid in connection with an accident in which Walter Juer of St. Boniface was killed last July 3.

Take Some Beating

LETHBRIDGE, Alta.—It would take a lot of cream to do justice to the strawberry that Mrs. George Halvorson picked recently in her garden at Coaldale. It weighed three-quarters of an ounce and was five inches in circumference.

A species of Canadian fish commonly eats small ducks.

ASPIRIN
RELIEVES

Grain Growers Ask Federal Aid

EDMONTON, Alta.—Prairie grain growers were reported in urgent need of ready cash and the Federal Government was asked to help them out.

J. E. Brownlee, president of the United Grain Growers' Ltd., appealed to the government to either release proceeds of last year's crop sales through the Canadian Wheat Board or increase the initial prices on this year's grain.

"Many western farmers urgently need more cash than they can obtain immediately from marketing of this year's crop," Brownlee said in a press statement.

He said "tens of millions of dollars" still was owing to farmers from last year's crop sales and suggested "at least" 25 cents a bushel on last year's wheat deliveries be a suitable interim payment.

"However, if this is not possible there should be a substantial increase in initial payments on this year's deliveries of wheat, oats and barley," he said.

Concludes Golfing Marathon

FLIN FLON, Man.—Caribou Bill Anger of Cranberry Portage, Man., "holed out" in front of the town hall recently to end his 45-mile marathon along the winding highway to Flin Flon. Anger took 1,152 strokes for the course, lost 15 golf balls and reported an elapsed playing time of 20 hours and 25 minutes. He was met at the town hall steps by Mayor Cyril Steventon.

Think Right—Eat Right—Live Right

ONLY ONE-TWENTIETH OF WESTERN OIL TAPPED

MONTREAL.—W. O. Twaits, a director of Imperial Oil Limited, said not more than one-twentieth of Western Canada's oil potential has been discovered.

The size of a drop of liquid is not standard.

Grain Shipping Rush On At Coast

VANCOUVER.—The rush of ships to take new crop grain from here to world markets has already started with 12 vessels here and one on the Fraser river, most of them booked to load full cargoes.

Funny and Otherwise

A boy dashed into a chemist's shop.

"Father's being chased by an angry bull," he announced.

"What do you want me to do about it?" asked the assistant.

"Put a new film in my camera and be quick," said the boy.

Remember when it used to be a compliment to be told that you were as sound as a dollar?

"Ethel, I'm ashamed of you. I saw that Frenchman in the hall kissing you repeatedly. Why didn't you tell him to stop?"

"I couldn't."

"You couldn't? Why not?"

"I can't speak French."

"Where is Jones?"

"He isn't here. His wife telephoned him that the baby was asleep, and he's gone home to see what it looks like."

The orderly officer was going his rounds at breakfast and stopped at one table with the usual query, "Any complaints?"

One man jumped to his feet and said: "Yes, sir, this tea tastes of chloride of lime."

The officer took the mug, sniffed the contents, then sipped delicately. "Nonsense," he pronounced, "that's carbohic acid!"

Slow—When I see you, I always think of Bud Jones.

Slower—But I's not a bit like Bud Jones.

Slow—Oh, yes, you are. You both owe me two bits. 2954

Polio, Triple-Threat Disease Yields, But Slowly, To Science

By DAVID A. HELLER
(CPC Correspondent)

What can you do to guard yourself and your child against attack from polio? How is the war against polio faring? What are some of the points of strength and weakness in man's fight against the paralysis?

To get some down-to-earth answers for parents concerned about the possibility of the disease striking their children, the above questions were put to several eminent scientists, including Dr. Victor G. Haas, Director, Microbiological Institute, U.S. National Institute of Health, a unit of the Public Health Service.

Contrary to popular opinion, polio is not one disease, but three.

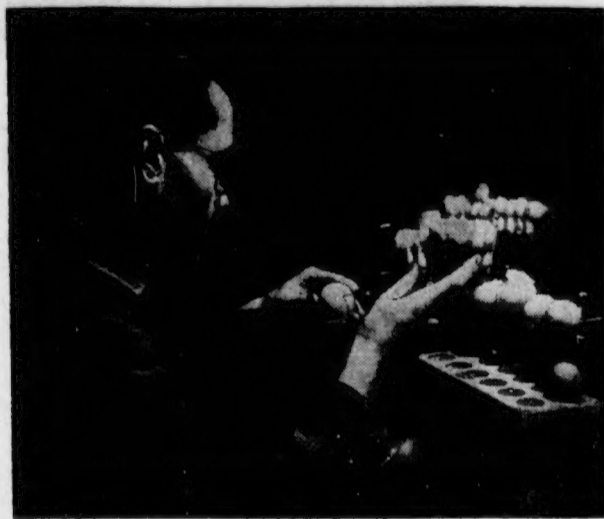

It has three closely related strains—Lansing, Brunhilde, and Leon. The diseases are caused by different viruses and complicate the scientific fight on the plague enormously.

Polio is a difficult series of diseases upon which to conduct scientific experiments. In scientific terms, the virus is "highly selective" as to the host in which it will grow. (Unfortunately, the list includes you and me.) Polio occurs naturally only in man and in the higher primates, apes, gorillas and certain monkeys.

These animals are rare and expensive. Laboratory research against polio has been slow and costly as a result.

Perhaps the most heartening advance in the fight on polio in recent years has been the introduction of the Lansing strain of the disease into the cotton rat and the white mouse. This was done at the Microbiological Institute.

If a cheap, plentiful laboratory animal, susceptible to all strains of polio can be found, progress against the disease will be enormously speeded up. Extensive research is being conducted at dozens of medical labor-

—Central Press Canadian.

Laboratory technician attempts to grow polio virus in eggs. Lack of any means of "mass-producing" virus hampers fight against disease.

atories all over America on this problem.

Scientists know that the vast majority of people who reach adulthood harbor the polio viruses. It is possible that most of us have "had" polio in a subclinical form. That is, our cases were so mild that they were not recognized as polio.

According to current medical theory, we may be carriers of the virus and could possibly communicate it to some susceptible person—usually a child—in whom it could erupt in a virulent form. That is the primary difficulty scientists have in controlling polio—nobody knows who could be a carrier and with whom to avoid contact.

The reason polio strikes children more often than adults is that most grownups have already been exposed to the disease and have developed an immunity to it.

In years gone by, there was an important difference in the way city people and country people reacted to polio. Rural residents were less likely to get the disease, but once they got it were more likely to have it in a virulent form.

Public health officials report that now, however, North America has become so mobile that this city-country difference no longer exists.

One of the great hopes against polio is that someone will discover a vaccine similar to that for smallpox, diphtheria and other diseases.

Unfortunately, at present, scientists have no way of growing the

virus in the quantities necessary to conduct research in mass experiments to discover a vaccine. If the virus weren't so "selective", we would probably have it whipped by now.

Recently Dr. John F. Enders of Harvard university succeeded in growing a form of polio virus in a tissue culture. This promises fruitful possibilities for future mass production of the virus.

When scientists have found a successful and inexpensive laboratory animal and are able to grow the elusive virus in the large quantities necessary for research purposes, they will probably soon find the key to controlling polio.

Turns Over Business To Employees

CHICAGO.—Louis Ludwig Narowetz, 59, is turning over his \$2,500,000 sheet-metal business to his 200 employees. Within five years, by his plan, they will own the company.

Narowetz said he has turned over 48 per cent. of the company's stock to nine executives of the firm who serve as a board of governors. He said he will make the balance of the stock available to employees in a bonus and dividend plan.

"They've earned it," Narowetz said. "I never would have got anywhere without their help."

On The Side : By E. V. Durling

Luck Of The Irish

If a girl marries a man of Irish birth or descent, her chances of becoming the mother of twins are above the average. That's what I have frequently reported. I was, therefore, much interested to learn that a Mrs. John Walsh is the mother of three sets of twins.

Feminine Touch

Leonard Crawley, the brilliant British golfer, recently opposed Mrs. "Babe" Zaharias on the links. Mr. Crawley said no woman had ever beaten him in a golf game and he was firm in the belief none could. He added that if Mrs. Zaharias beat him he would shave off his moustache. She did beat him. Crawley later said to a reporter: "That Mrs. Zaharias is a fantastic woman. Do you know she started the match by kissing me on the back of the neck!"

Pity The Bride's Father

Did you have a church wedding? What were the church expenses? Or didn't you pay any attention to such sordid details at such a romantic period. The expenses for a wedding in St. Paul's cathedral, London, one of the world's greatest churches, are: Choir, \$125; organist, verger, etc., \$45; workmen, \$28; printing, \$140; ringing the bells, \$15. If there is a red carpet laid on the steps and into the church, the charge for that is \$280. Guess it is something to talk about, being married in St. Paul's.

Pin Money

From the British government, Princess Margaret receives an annual allowance of six thousand pounds (\$16,800); Queen Mary receives seventy thousand pounds (\$196,000); Princess Elizabeth forty thousand pounds (\$112,000), and the Duke of Edinburgh, ten thousand pounds (\$28,000).

The Barefoot Girl

How long does the average business girl take to get dressed to go to the office? A large organization was harassed by having so many of its feminine employees arrive late to work. It was decided the young women took too long to dress. So some genius originated a one-piece combination garment of dress, underwear and corsets. A girl wearing one of these garments can be completely dressed in thirty seconds. Or so it is alleged. If that is accurate, the girl would have to go to work barefooted. Also stockingless. Also, how about that hair-do and make-up. I believe a clever girl might get completely dressed in 10 minutes, but no less.

Basic English

A subscriber says she was recently bitten by a "Noseumo" and suffered severe pain and had a badly swollen leg. She says a Noseumo is a gnat that is almost invisible. Its name was inspired by Indians referring to it as a "No see 'em."

Attention, Housewives!

Of feminine office workers filing clerks are said to have the best figures. That is because their work requires them to bend over and be otherwise active in a way beneficial to the general contour. So if your secretary is getting a little plump, give her more filing work to do. Housework is also said to be of great benefit to the feminine figure. However, there are so many plump housewives that this claim is repeatedly questioned. Those advancing it say the plump housewives don't handle their housework in a manner that aids the figure. That special instruction is needed. They also say the average home manager eats too much. Has too many snacks during the day and sits down too much. That only an active, energetic woman can hope to have housework aid her in retaining her schoolgirl figure and improve her appearance in a bathing suit.

Miracle Of Snowflakes

American Naturalist Spent 40 Years Photographing Them And Never Found Two To Be Exactly Alike

The quiet grace of snow lying all around us is beautiful indeed and a source of joy to the painter, photographer, skier and tobogganist. Though commonly white in appearance snow in certain parts of the world ranges from red to yellow and even green. In southern Europe, large expanses of snow take on a reddish hue due to the presence in it of a scarlet colored vegetable organism which is found growing to some depth. In Baffin Land, a similar type of plant phenomena gives a greenish effect to the snow. The pollen of fir trees will often transform the mantle of white beneath them into a pale yellow carpet.

Snow is formed when miniature particles of water around the dust in the air freeze. In summer usually only the highest clouds are composed of ice crystals except for large shower or thunder clouds in which hail or snow pellets exist between the water droplets. In winter, however, all the clouds, even the lowest, may be of ice crystals.

When the minute particles freeze, they turn into crystals which vary in size according to the height at which they are frozen. High clouds are of small and compact crystals and low clouds of larger and more

feathery ones. Generally speaking, in one particular storm, the crystals are all of the same shape and type. The snow we see falling to the ground is composed of a mass of these crystals which cling together to make flakes as large as three quarters or as small as one fiftieth of an inch.

Crystals of snow are mainly six-sided, with filaments always at an angle of 60 or 120 degrees. Their beauty lies however in the rich intricacy of design produced by tiny ice-tubes of air which grow from the main crystal form.

Though there are many subtypes of crystals, they are principally grouped into two classes: columnar and tabular. The columnar kind are long and slender crystals which taper at one end, while the tabular ones are flat in appearance and six-sided.

When falling to the ground, the tabular crystals may become attached to one or both ends of the columnar ones. As one of the tabular crystals is usually much larger than the other, the contraption descends to earth in the shape of a parachute with the smaller tabular crystal taking part of the parachutist.

By far the most interesting is the tabular variety, for in this group are to be found the crystals with the greatest beauty and difference of design. Jewellers, metal workers, in fact anyone may find an infinite source of inspiration in them. Wilson Bentley, an American Naturalist, spent almost 40 years of his life photographing them and never found two to be exactly alike.

Hugh MacMillan, in one of his books, writes: "I know of no purer intellectual joy than that of gazing through the microscope upon snowflakes which are miracles of loveliness. . . . Such beauty is a reflection of the Divine image, not something that God does, but something that He really is, really and suitably part of Himself. All true beauty is something higher than creation and independent of it; something that God has not made, an attribute as much linked with our conceptions of Him as His wisdom and justice. It wakens that curiosity about God, which is an essential element in worship."

FOUR POLES TELL OF ESCAPE—Climaxing two years of planning and a perilous 450-mile flight across Baltic sea from their Red-dominated homeland, three Polish youths and 20-year-old Polish girl arrived safely in Quebec City aboard an Italian liner. In a terrifying escape story lively-loving quartet told of their flight on August 12 in single-engine plane, they had stolen from Warsaw airfield. Dodging gunfire from guards below, plane took off safely, only to go into dizzy spin, due to breaking of heavy overhead door. Four managed to secure door before plane crashed. Perilous flight ended when they landed three hours later in Sweden.

—Central Press Canadian.
FACES JUDGMENT—Major Walter Reder, 36-year-old ex-German officer, stares straight ahead in court in Bologna, Italy, where he is being tried by an Italian tribunal on charges of being responsible for the massacre of some 1,750 Italian civilians during 1944. Reder was a wartime commander of a Wehrmacht Division stationed near Bologna.

A point near Gibraltar is farther south than any other point on the mainland of Europe.

RUSSIAN GRAIN FLOWS TO BRITAIN—Close to a million bushels of Russian grain is flowing every year into British granaries in return for British products. Protests from the U.S. over Britain's trade with the U.S.S.R. were answered by Foreign Minister Herbert Morrison, who said: "To do without the things we get from Eastern Europe would damage and dislocate our economy for a return that would yield us little." Here a British coastal ship takes on a load of Russian barley for transport around England.—Central Press Canadian.

Bang's Disease

By W. S. Backman, Field Supervisor, Agricultural Service Board, M.D. Kneehill No. 48

Livestock men in Alberta are fortunate in that there are only a few diseases of cattle to combat. Many diseases which cause tremendous losses among livestock in other countries are not present here. But Brucellosis or Bang's Disease is important in this district and does cause serious losses. Bang's is important, too, because the infection is transmissible from animal to man, and will cause Undulant Fever.

The most common manner in which Bang's Disease is transmitted to a clean herd is through the introduction of an infected animal. The disease may also be contacted by placing healthy cattle on a common pasture with infected animals.

The disease is spread mostly at the time of the abortion of an infected animal. The afterbirth, the fluid in the membrane of the foetus, and the discharge which may persist for several weeks after the animal has aborted are teeming with Brucella bacteria. The infected material may be spread about the pasture, yard or stables and contaminate the feed and water. Cattle may eat, drink or lick this contaminated material.

Man may acquire Undulant Fever by drinking raw milk from infected cattle. Actually very few people who drink infected milk develop the disease but it is one of the most important sources of infection in man. Pasteurization kills the bacteria.

The bacteria may also enter the body through cuts in the hands.

Losses from brucellosis are calculated in the value of the lost calf, the value of the decrease in milk production and the value of the occasional cow which has to be discarded due to sterility. The losses to cattlemen in this district was very high last spring. It amounts to millions in all dairy countries.

Veterinarians can take a blood sample from each animal, forward the blood to the Veterinary Laboratory in Edmonton and in 48 hours after it reaches there, he will know if there is Bang's in the herd.

Many livestock men prefer to follow a yearly program of calfhood vaccination. Calves are vaccinated between the ages of four to eight months to develop a resistance against Brucellosis. If a program of vaccination is followed for five or six years a herd can be built up in which the vaccinated heifers replace the reactors. Calfhood vaccination can be on a voluntary basis or compulsory in a Bang's Restricted Area.

The Starland M.D. east of the river is a compulsory area. Local cattlemen assist in organizing the vaccination program. The Wainwright M.D. under the compulsory plan has a captain for each township. He looks after the local arrangement in conjunction with the Agricultural Service Board and the veterinarian. In the Leduc M.D. they insist, under the voluntary plan, that the calves be tied up, otherwise they pass them by. In that way they get the co-operation of all stockmen. The veterinarian loses too much time if he has to

wait until the calves are rounded up. Where the herds are widely scattered it has been suggested that the calves be brought to one central corral in the township. Some have found they save time where there are two or three calves to be vaccinated by taking them to the veterinarian. At the present time this is the surest way to get calves vaccinated during the in-between season where calves are widely scattered and in a voluntary area.

It is unfortunate that there is not a Veterinarian located in the Kneehill M.D. The Veterinarian must be brought from Drumheller or Olds. It is not economical for either of them to drive a long distance to vaccinate two or three calves at \$1.00 each. It is also true that they have a better paying business and are evidently very busy in the municipalities which are included in the Bang's Restricted Area. In these areas they do not drive past a number of herds where there are calves which should be vaccinated, in order to do the calves of cattlemen who appreciate the value of their service.

The Agricultural Service Board will arrange annual vaccination. They will draw up itineraries and turn over lists of calves to the Veterinarians to do the work in their own time. They make their own collections and provide their own transportation. It was the opinion of representatives of Service Boards, at a conference last spring, that this is the fairest to both veterinarians and cattlemen. The former can do work when required and be freer to take care of emergency calls. Scattered cattlemen have requested service during the past summer for in-between season calves. Their names and location were forwarded to the Veterinarian.

As soon as two-thirds of the cattle owners of the Kneehill M.D. are willing to sign a petition requesting a Bang's Restricted Area it will be forwarded to the Alberta Minister of Agriculture through the Director of Veterinary Services. The Restricted Areas will be administered by the Service Board and Veterinarian concerned.

Orienteering—A Great Sport

As many as 5,000 persons have been known to take part in one single sporting event in Sweden. That event is Orienteering, which has become a national past-time there. Certainly, there aren't likely to be any larger entry lists on record anywhere.

Orienteering is cross-country running with a new twist. It is ideal for track men doing fall conditioning work, for Boy Scouts, and for other clubs and organizations seeking interesting and healthful activities.

The requirements of this sport are simple—a map, a compass, and a little knowledge of map reading. It can be extremely exciting and keenly competitive when well organized.

Contour maps of the area over which an Orienteering competition is to be held should be obtained by organizers. They should go over the course beforehand to mark "Control Stations" with paint or strips of cloth. These should stand out, and it is best to locate them on prominent places such as the crest of a hill, in a clearing or beside a fork in the road. The starting and finishing station are at the same place.

Working as individuals, or as teams if it is a team race, competitors start at two minute intervals. They are allowed to study a map for 10 minutes before starting, and on it are marked the locations of the various control stations. At the end of this time, the maps are taken away.

During this study period, competitors plot their course between each station. Smart athletes will note the easiest course (not necessarily the shortest) which avoids steep hills, swamps, etc. Compasses are carried during the race to calculate direction. Consequently, those who learn to use their compasses and maps effectively will have a strong advantage.

The Silva Compass, developed in Sweden especially for Orienteering, is also available in Canada.

At Control Station number one, an

official checks off the competitors as they arrive, and shows them a map on which is marked the location of the second Control Station. This continues throughout the race. The winner is the man or team which covers the course in the shortest time.

For beginners, the Orienteering course should be simple, with perhaps four or five control stations about one half mile apart. As the competitors gain experience, however, the course can be made longer and more difficult.

Further information on this fast-growing and exciting sport is available from Sports College. The Silva Co. Ltd., 77 York Street, Toronto, has published a book entitled, "The Sport of Orienteering", which contains information on many different types of Orienteering competition.

Listen to the C.B.C. radio station in your area each Saturday afternoon, when famous athletes and coaches give training advice on the Sports College radio session.)

Alberta Cannery Corn \$200,000 Failure

LETHBRIDGE, Alta. — Southern Alberta's crop of cannery corn is a \$200,000 failure, cannery operators said.

Three thousand of the 3,600 acres in cannery corn this crop year have been written off as unfit for canning following recent snowstorm and killing frost.

Operators said the failure of the southern Alberta crop is certain to produce a shortage of canned corn in western Canada.

VEGETATION IMPORTANT

Nature's first defence against soil erosion is the vegetation which covers the earth.

Alberta Flyer Heads Squadron

—Central Press Canadian.

With increased deliveries of the R.C.A.F.'s new jet trainer, the T-33, more squadrons are being equipped with these aircraft enabling pilots to become familiar with jet flying until sufficient Canadian-built F-86 Sabres are available. Primary use of the T-33 will be to convert pilots from the conventional piston-driven aircraft to jet-propelled fighter planes. Latest squadron to receive the new trainer is 416 Squadron at Uplands, Ottawa, whose officer commanding Sqdr.-Ldr. Don Laubman, D.F.C. and Bar, of Provost, Alta., is shown beside one of the sleek, new aircraft. The T-33 is a modified two-seat version of the American F-80 Shooting Star and is capable of speeds in excess of 600 m.p.h.

MOTHER AND SON EMBRACE ACROSS BORDER

A Russian mother who lives in Vancouver and her 25-year-old son from San Francisco embraced across the international border at the Blaine, Wash., peace arch, neither being allowed to set foot across the line. "I've waited so long for this moment," said Mrs. Alexandra Ponomareff as she met her tall son, Serge, for the first time in 16 months. The mother and son became separated in strife-torn Shanghai.

ROMANTIC NAME

Gretna, a village in Manitoba, was named after the Scottish border town made famous by runaway marriages.

Kitchen Meditations

By JANE DALE

THE HIGH COST OF LIVING

In the papers today I have just read this sad tale—
The cost of living in Canada has reached a new high.
I suppose every month it will be the same story
Until prices have reached the limit—the sky.

A pound of the cheapest meat I buy for a stew.

A meagre wee pound—it looks like a spot;

I add carrot and onions and some diced potatoes

In a good sized dish to make it look like a lot.

And the dear old bologna—how children do love it!

Once so despised and the humblest of meat

Is now in high brackets, looks askance of no one

And when we do buy it we think bologna's a treat!

The plain homely prune I oft served for breakfast

Because it was cheap, yet good vitamin fare

Has risen in status and price 'til it stands now

On par with the orange, the peach and the pear.

And so with all foodstuffs from raisins to pepper,

There's just nothing cheap about them any more.

My grocery bill grows to staggering proportions

And yet I'm not eating as much as before!

Moist Dithagreeable

When someone stole the 's' from the printing office.

There had been a burglary in a village. Next morning the town weekly came out with the following item:

Lath night thome thieving thecoundrel thtlo into our compothing room and pilfered the cabineth of all the eththeth (s's). Therefore we would like to take advantage of thith opportunity to apologize to our readerth for the general inthipid appearance of your paper. We would altho like to thate that if at any time in the yearth to come we thould thee thith dirty thnake in the grathth about the prethitheth, it will be our complete and thoro thathithaction to shoot him full of holeth. Thank you!

Prejudice is the reason of fools.

World Happenings Briefly Told

Twelve large helicopters recently landed fully-equipped United States marine reinforcements in North Korea in the first combat helicopter landing in history.

The United States army is turning to foreign markets for more than 12,000,000 pounds of beef, after being offered only 190,000 pounds by United States packers.

A halibut weighing 225 pounds was recently caught by 84-year-old Ola Haltbakken of Aalvundfjord, western Norway. The veteran angler struggled two hours before the giant fish gave up the fight.

London hospital authorities examining a man charged with attempted suicide found he had swallowed pins, needles, broken glass, cuff links, studs, buttons, flashlight bulbs, pieces of tin, paper clips and wool.

Sparrows delayed repair work at the centuries-old St. Giles Church in Camberwell, England. They built nests between a displaced stone buttress and the wall, and authorities decided to let them stay until the young sparrows grew up.

A thick layer of some strange brown substance on a London street snarled traffic for more than three hours recently. It turned out to be a stream of liquid chocolate oozing from a leaking tank car.

Justice Minister Garson says Canada's defence effort may last a generation or more and that Canadians should continue to make sacrifices and accept inconveniences to achieve the long-term goal of maintaining peace.

Bungalow is an Anglo-Indian word adopted from Banga, meaning Bengal.

Answer To Last Week's Puzzle

Rise In Wool Prices Affecting Australian Wheat Acreage

11,000,000 Acres Sown Compared To Post-War Peak Of 14,000,000

SYDNEY.—Chiefly as a result of the rise in wool prices since 1948, Australian wheat acreage is falling rapidly. Compared with the post-war peak of nearly 14,000,000 acres in the 1947-48 season, private estimates place the area sown in the new season at not more than 11,000,000 acres.

Experts forecast a sharp decline in overseas trade in wheat, Australia's second greatest export after wool. In each of the last two fiscal years wheat and flour exports were worth £108,000,000 to Australia (the Australian pound is currently about \$2.38 Canadian) but in the current year they may fall to £70,000,000.

The decline in wheat acreage has been more pronounced in New South Wales than in any other state. The total Australian acreage in 1950-51 was 14 per cent. lower than 1947-48, and a further substantial decline has been shown this season. In New South Wales alone wheat acreage is about 40 per cent. lower than four years ago.

The changes in wheat and wool prices are the chief factor. Compared with four years ago, wheat prices have dropped about 12 per cent., while wool prices have more than tripled.

In recent years domestic requirements have absorbed about 80,000,000 bushels of wheat annually. The 11,000,000 acres sown this season would normally yield about 140,000,000 bushels. At present seasonal conditions are particularly good throughout Australia and another above-average crop may be harvested.

But the growing season in Australia is different to that of Canada, and it is too early to forecast accurately the harvest of late November and December.

If no more than normal yield per acre is obtained, Australia would have only about 60,000,000 bushels of wheat available for export without drawing on its carry-over stocks.

Australia, however, is committed under the international wheat agreement to supply 87,000,000 bushels during this and the next season, and much of its quota for the present I.W.A. year, beginning Aug. 1, is already sold. Australia will probably be able to meet its international commitment this year by drawing on its carryover, but the outlook for the future is doubtful.

Further declines in wheat acreage are predicted for next year's crop season unless the wool market collapses, sending more sheep farmers back into wheat. The latter seems most improbable.

Quick Canadian Quiz

1. Canada is leading producer of what fireproof mineral?
2. Of Canada's 5,000,000 labour force, how many are trade union members?
3. Of Ottawa's \$3.7 billion budget how much is for non-defense spending?
4. Is Halifax closer to London, Eng., or Vancouver, B.C.?
5. What is the area of a "section" on the prairies?

Winnipeg Woman To Build Atom Shelter In Own Backyard

WINNIPEG.—Ald. Maude McCreery is determined not to be caught napping if Winnipeg is atom bombed. She applied for a permit to build a concrete underground bomb shelter in her backyard, she said she hopes other citizens will follow her lead.

"I'm trying to sell citizens on the importance of civil defence," said Ald. McCreery. "So I've got to believe in it myself don't I?"

Her shelter will be seven feet below the surface and 14 feet square. It will have two entrances, two double-decker beds and space for food and water.

Inspections Engineer Earl Simpson estimated the cost at more than \$500.

Helpful Hints

To soften and clean leather furniture use a mixture of one part hot vinegar and two parts linseed oil. Apply this solution with a cloth and rub the leather dry. Then polish with another clean cloth.

When buying beef, check the fat as a guide in getting your money's worth. Better grades will have a moderately-thick covering of firm white or creamy-white fat on the outside. Poorer cuts often have soft or oily fat.

If a medicine bottle has lost its label and you are not sure what the bottle contains, better throw it away for safety's sake. If a label becomes loosened, paste it back on at once.

Plastic piano keyboards can be cleaned with a clean, damp cloth first dipped in warm soapy water, and then in clear water. This treatment will keep the keys dust-free and clean to the touch.

SMILE OF THE WEEK

"I don't know how to answer this question."

"What's it say?"

"It says: 'Who was your mother before she was married?' Heck, I didn't have any mother before she was married."

2954

Something New In Transportation Line

Visitors to exhibit of new inventions and handicraft at the Paris, France, exposition were startled by variety and ingenuity of inventions submitted by 800 inventors from ten countries. Favorite with the public was this individual helicopter modelled by its proud inventor.

GEMS OF THOUGHT

GENEROSITY

I was an hungered, and ye gave me meat; I was thirsty, and ye gave me drink; I was a stranger, and ye took me in.—St. Matthew.

He who is afraid of being too generous has lost the power of being magnanimous. The best man or woman is the most unselfed.—Mary Baker Eddy.

Nothing is generous, if it is not at the same time just.—Cicero.

Give for the joy of giving and sing hymns of thankfulness that you have it to give.—Herbert Hoover.

We should be as generous with a man as we are with a picture which we are always willing to give the benefit of the best light.—Ralph Waldo Emerson.

To pity distress is but human; to relieve it is Godlike.—Horace Mann.

Woodchucks make interesting pets and are easy to care for.

Bigger Fruit Crops Forecast

OTTAWA.—Bigger crops of pears, peaches and grapes were forecast by the bureau of statistics in its third estimate of all-Canada production of fruits. Output of apples, strawberries and raspberries was lower.

Estimates, with 1950 production totals in brackets follow:

Apples 14,616,000 bushels (16,166,000); pears 1,229,000 bushels (864,000); plums and prunes 691,000 bushels (600,000); peaches 1,713,000 bushels (1,222,000); cherries 418,000 bushels (359,000); apricots 53,000 bushels (18,000); strawberries 24,726,000 quarts (27,121,000); raspberries 9,721,000 quarts (11,964,000); loganberries 852,000 pounds (1,197,000); grapes 124,218,000 pounds (109,189,000).

ATOMIC SLANG

Atomic scientists term producing nuclear fission bursts without provoking an atomic blast, "tickling the dragon's tail."

: Selected Recipes :

Who would think that chicken goes with cheese? This casserole combines the flavor of chicken with a cheese biscuit topping, that makes it fine fare for family or guests.

CHICKEN CASSEROLE

One third cup butter, 4 tbsp. flour, 2 cups chicken stock or milk, 2 to 3 cups cooked chicken, salt, pepper, 1 hard cooked egg, cheese biscuit dough.

Melt the butter. Add flour and mix well. Cook without browning.

Add chicken stock or milk or a mixture of the two. Cook 20 minutes, stirring to prevent lumping.

Add salt and pepper to taste. Arrange chicken meat, sauce, and sliced hard cooked egg in a casserole. Top with cheese biscuits.

Bake in a hot oven (425 to 450 degrees F.) for 20 to 30 minutes.

CHEESE BISCUIT

Two cups flour, 3 tsp. baking powder, 1 tsp. salt, 4 tbsp. butter,

1½ cups grated cheese, 2/3 to ¾ cup milk.

Sift flour and measure; add baking powder and salt. Sift a second time. Cut in the butter and one cup of the grated cheese. Add milk to make a soft dough.

Place on board and knead very lightly. Roll to one-half inch thickness. Brush with melted or softened butter.

Cut with a biscuit cutter. Arrange on top of the casserole. Prick with a fork.

Bake in a hot oven (400 to 425 degrees F.) 20 to 30 minutes. The remainder of the cheese may be sprinkled over the top a short time before removing from the oven or as a topping when served.

Strange Tale Of Oriental Revenge Told

Seven Persons Shot to Death As Result of "Divorce Oath"

CAIRO.—Seven persons were reported shot to death in a strange Arabian nights tale of Oriental revenge. The trouble started, the news magazine Akhbar El Yom reported, when a village child in the Nile delta area threw a stone at a passing camel.

The stone hit the camel in the eye and blinded that eye.

The son of the village mayor—who owned the camel and was riding it at the time—swore an oath to cut the child's throat.

The oath he took is called the "divorce oath". It's the most serious known in this part of the world. If a man does not fulfil a "divorce oath" he must put aside his wife.

The father of the child who threw the stone offered to buy the camel to make up for his son's mischief. The mayor's son refused.

The father then consulted the village sheikh or religious leader.

The sheikh advised that the oath could be fulfilled if the mayor's son drew the dull edge of a knife over the child's throat. He also counselled that the father should then buy the camel.

Both parties accepted the solution. A village council was called and the child presented his throat to the mayor's son—who held the knife.

The mayor's son applied the dull edge of the knife to the child's throat—then—just as he drew it across he reversed the blade, severing the jugular vein.

But the child's father had been aroused by the suspicions of his wife. He had taken a pistol with him.

When he saw his son's blood spurt, he drew his gun and went amok. He shot the mayor's son, the sheikh and others present before order was restored.

ODDITIES In The News

A parking meter is located in front of the court at Moose Jaw, Sask., but a few feet away there's a sign saying "court house—no parking."

Frank E. Brown, Joliet, Ill., auto dealer, announced he will build five houses and rent them "only to families with children and pets." "Over the years," he said, "I have found that the only people who take care of a house and make it a home are those with a family."

Two boys under 12 years of age were charged in juvenile court at Plymouth, England, with breaking 107 panes of glass on a building site. The mother of one of the boys said she would scrub floors to pay for the damage.

The old story of a boy and his dog may be just so much fiction, according to L. J. Dyal, assistant pound master at Jacksonville, Fla. Dyal said about 250 dogs are disposed of each month after being kept at the pound for longer than the required waiting period. "Kids just don't seem to go looking for them," Dyal said.

An easily-chilled tenant of New Westminster, B.C., who smuggled an electric heater into his basement is looking for new lodgings. He hid the heater in the bottom drawer of a dresser and forgot to turn it off. Firemen were called to put out the blaze.

E. P. Moore, of nearby Delmar has a new roof on his home, but he didn't ask for it. A roofing crew finished up the job before they realized they were working on the wrong house. Now Moore and the roofing company are discussing a settlement.

VIRGIL

OUR COMPLETE SHORT STORY—

Sagebrush Learning

Hoot Had To Show Her
Prince Was A Killer.

By CAROL ELY HARPER

"HERE'S your horse and I hope he teaches you a lesson!" Hoot Holden snapped, as he rode Black Prince to a pawing standstill before the girl. He sat the saddle arrogantly. Her own eyes were hot with contempt.

"You think you're so almighty smart!" Ina Larimore said.

"You're spoiled!" Hoot drawled. "You think because you're the boss's sister, and your Dad's a big shot, and all the boys eat outa your hand, there's nothin' on this ranch you can't have. Prince is the meanest horse in Arizona and no woman's ever rode him!"

A whirl of dust rose in the barnyard, a cool breeze on the sagebrush desert.

Ina's laugh chimed mockingly. "You're just jealous!" she threw at him.

"That's a lie!" His brown cheeks paled. "You little blockhead, I'm trying to tell you Prince is a killer!" In an instant Hoot had leaned and with his strong arm had swept Ina's slight weight up and into his embrace. The horse reared and, wild under the unaccustomed weight, tore wildly out the open barnyard gate and took the road between the sagebrush across the prairie. "Hoot!" Ina gasped. "Are you crazy?"

"I'm going to teach you a lesson!" Hoot's powerful hand on the reins drew Prince to a halt. Roughly he dropped Ina onto the rocks. Lariat in hand, he swung down out of the saddle.

"So you want to ride Prince solo? See this canyon, closed at that end? The only way you can get out is over the walls, or at this end. And I'm going to be the wall at this end. I'm going to sit up here on this rock, and if you and Prince try to get out the canyon past me, I'm going to

shoot in front of you! Prince doesn't like shooting. He won't go past me long as I've bullets left! And my belt's loaded."

"What fun!" Ina chirped, blue eyes smiling. "And what am I doing, Mr. Cowboy, while you sit and shoot?" "You," Hoot stated, "are going to be astraddle Prince. Your feet will be tied under the saddle so you can't get off. And you'll ride and ride till the moon comes up and the moon goes down, and you admit that you are just a silly little spoiled rich girl, and that you don't want to ride Prince anymore, and that maybe, just maybe, everybody—including Hoot Holden—isn't in love with you, and jealous!"

"What fun!" Ina smiled scornfully, as Hoot tied her on the trembling, shying horse. He put the reins in her lax hands. "Get up!" He let go his anchoring grip on Prince's bit. Prince reared. Ina was prepared. She realized she was tied so securely she could not fall. If only Prince kept his feet! And he was a magnificent horse! He'd not lose his balance, even in the rocks of the canyon! And no woman had ever ridden him—solo! She would show Hoot!—and Prince!

Prince whirled and tore for the canyon opening. Hoot jerked up his six-shooter and fired.

Prince screamed as the bullets burned the air before his nose. He whirled on his hind feet and shot madly toward the walled end of the blind canyon.

Grimly Hoot watched her white face, her blazing blue eyes and set mouth. "Enough?" he shouted. She glared at him. No, she'd not give in yet! Thundering, Prince rounded the closed end of the canyon, shot towards Hoot, again attempted to pass Hoot. Again Hoot fired before the horse's nose. Prince screamed, reared, whirled, and dashed away again.

But Ina put up her hand. She knew she had had enough. "Whoa!" Hoot shouted, running. "Down, Prince! Down! Whoa there, boy! Good boy, steady!" He got the devil-horse by the bit and dragged him to a halt.

Ina smiled whitely down at Hoot's hard, pale face. "See?" Hoot said shakily, "if you were ridin' out alone on Prince—you'd have been thrown—and he'd never stopped! Good as you are, he'd throw you and tromp on you! He'd kill you!"

"I see," she whispered. "You win! I'll never ride him again—"

Grimly Hoot untied her. Trembling she slid to the ground. She lay back on the rocks, her eyes closed. "Want to ride back home with me, or walk?" Hoot asked dryly.

"Walk, please," she said faintly.

Hoot looked down at her, his eyes dark, his brown face still. Then he laid Prince's reins gently upon his neck. "Home, Prince!" he ordered softly. "Go home, boy!" Prince snorted and whirled and disappeared with a ringing of hoofs through the entrance of the canyon.

Ina looked up at Hoot. "You hate me, don't you?" she said sadly.

Hoot's dark face was strained and queer looking. "I had to show you Prince is a killer—" he said coldly.

New Coyote Killer Proves Successful In Farming Areas

EDMONTON. — Alberta's coyotes are in for a rough winter. Scattered tests of new cyanide "coyote getter" guns claimed the lives of 60 of the "pesky varmints".

William A. Lobay, provincial crop pest control chief said that Peter Chubb, an area control officer in the municipal district of Ponoka, 60 miles south of Edmonton, produced the best score in the early tests.

Mr. Chubb set out 30 "coyote getters"—and scored 23 dead coyotes.

"The beauty of the coyote getters is that they kill the coyotes in the farming area where the predatory animals do the damage to flocks and herds," said Mr. Lobay. "Formerly, most of our coyotes were killed in unsettled areas where they were doing comparatively little harm."

The Alberta minister of agriculture has received applications from 19 municipal districts that wish to organize under the anti-coyote campaign.

"Or, when I'm off ranching, he'd kill you—"

"Oh, I see—" she said dreamily. "I was right. You hate me because you love me . . ."

His lips closed hers. He said huskily, "Let's don't fight any more. I hate you, I love you—what difference does it make?"

"None—" her voice was husky also —"if you kiss me like that . . . Oh, darling . . . I told Dad yesterday over the telephone I wanted to marry the best cowpuncher in the country. And he said 'Attagirl! That's what I've been waiting to hear! I've got a stock ranch all ready, for a wedding' present for you and Hoot!"

Something happened to Hoot then; he seemed to lose all control of himself. He trembled. "Or maybe—" Ina put her head on one side and looked at him with gay mockery—"maybe you are too proud to marry a spoiled little rich girl with a stock ranch for her dowry?"

"Well," Hoot said humbly, his brown face puzzled, "I'll pay him back—for the ranch, I mean. But—" he stared at her with dazed dark eyes—"what shore beats me is how you guessed my feelin'!"

"Oh, darling!" Ina's hand slid over his brown cheek tenderly. "I've hated you—and loved you!—ever since I was a little kid! But if you hadn't been so afraid I'd ride horses I shouldn't, and teaching me not to—I'd have never guessed, darling, that you loved me!"

(Copyright Wheeler Newspaper Syndicate)

APPLES BREATHE

Apples breathe much as humans. The higher the temperature the faster the breathing and the more quickly the apple will deteriorate. The coolest place in the house above freezing is the best apple storage.

Knowing the breeding history of animals used for breeding is a good rule.

A treat you can make easily with

new fast DRY Yeast

Now you have Fleischmann's Fast Dry Yeast, forget about the oldtime hazards of yeast baking! Always at hand—always full-strength and fast rising! Keep a month's supply in your cupboard! Make this delicious Chelsea Bun Loaf—cut in slices for buttering, or separate the buns.

CHELSEA BUN LOAF

Make 3 pans of buns from this one recipe—dough will keep in refrigerator for a week.

Scald ¾ c. milk, ¼ c. granulated sugar, 1½ tps. salt and ¼ c. shortening; cool to lukewarm. Meanwhile, measure into a large bowl ½ c. lukewarm water, 1 tsp. granulated sugar; stir until sugar is dissolved. Sprinkle with 1 envelope Fleischmann's Fast Rising Dry Yeast. Let stand 10 mins., THEN stir well. Add cooled milk mixture and stir in 1 well-beaten egg. Stir in 2 c. once-sifted bread flour; beat until smooth. Work in 2½ c. once-sifted bread flour, knead on lightly-floured board until smooth and elastic. Cut off 2½ of dough, knead into a smooth ball, place in greased bowl, grease top of dough, cover and store in refrigerator until wanted. Shape remaining ½ of dough into a smooth ball, place in greased bowl and grease top. Cover and set in warm place, free from draught. Let rise until doubled in bulk. Cream ½ lb. butter or margarine and blend in ½ c. brown sugar (lightly pressed down), 1½ tps. ground cinnamon and 3 tbs. corn syrup; spread about ⅓ of this mixture in bottom of a greased loaf pan (12" x 8½") and sprinkle with pecan halves. Punch down risen dough and roll out into an 8" square; loosen dough. Spread with remaining sugar mixture and sprinkle with ½ c. raisins. Loosely roll up like a jelly roll. Cut roll into 6 slices. Place in prepared pan. Grease tops. Cover and let rise until doubled in bulk. Bake in moderate oven, 350°, 25-30 mins. Let stand in pan for 5 mins. before turning out.

Miss Claudia Pinza Compares Blue Bonnet — Loves It Best!

Accept an invitation from Claudia Pinza. Compare BLUE BONNET Margarine with any spread at any price. Like the singer and singer's daughter, you'll love BLUE BONNET's fresh, sweet flavor! QUESTION: Who is eligible to open an Annuity account?

ANSWER: Any Canadian citizen resident in Alberta for three years preceding application is eligible and may continue deposits even though he or she later leaves the Province.

QUESTION: How do I become a Depositor?

ANSWER: Applications will be received at any Treasury Branch or at the office of the Deputy Provincial Treasurer, Legislative Buildings, Edmonton, where Agreement forms may be obtained.

QUESTION: What payment shall I be required to make?

ANSWER: An initial deposit of at least \$10.00 is required and thereafter deposits of not less than \$5.00 will be accepted at any time convenient to the Depositor. Deposits may be made at any Treasury Branch, or at the office of the Deputy Provincial Treasurer, Edmonton.

LITTLE NEWS ITEMS OF LOCAL INTEREST

Syd T. Cannings has accepted a position as second man at the U.G.G. elevator at Acme.

Mrs. Wes Watts is visiting at the home of her parents, Mr. and Mrs. Jim Cooper.

Mr. and Mrs. Jules Ancelet and son, Edgar, Mr. R. McWilliams and Mrs. Winifred Sherring of Calgary were visitors at the home of Mr. and Mrs. Frank Sherring over the long weekend.

Alex R. McTavish, R.O., Graduate Optometrist, will visit Shaw's Drug Store, Carbon, on Monday afternoon, October 15. Complete, dependable eyesight service and repairs.

Miss Shirley Desson of Calgary was a guest at the home of Mr. and Mrs. Les Gillespie over the holiday weekend.

Gordon McLeod spent the weekend at the home of his parents in Carbon.

Mr. and Mrs. Joe Heffernan and family of Calgary were weekend visitors at the home of the latter's parents, Mr. and Mrs. W. Reid.

Don Pattison of Wetaskiwin visited over the weekend with his father, Charles Pattison.

Mr. and Mrs. Clifford Cline and family of Calgary were weekend visitors at the home of Mrs. L. Bertsch.

The United Church Junior Ladies' Aid will hold a Sale of Home Cooking in the Farmers' Exchange on Saturday, October 13, from 7 to 9 p.m.

Mrs. Margaret Atkinson returned Friday from an extended visit with her daughters at Camrose and Devon. Weekend visitors at her home were Mr. and Mrs. Stan Machell of Calgary and Mrs. Ed Basant and family of Camrose.

Miss Viola Embree of Acme and Miss Dorothy Mortimer of Calgary were holiday weekend guests at the home of Mrs. Ruby Mortimer.

Type gremlins crept into our columns last week when we reported that a son had been born to Mr. and Mrs. George Levins. The new arrival was a girl, and we offer our sincere apologies for the error as we know the young couple are very pleased with their first daughter.

We regret to report the death at Linden Nursing home Thursday, October 4, of Mrs. Mary Ives, a former Carbon resident. Rev. G.B. Hotchkis officiated at funeral services conducted at Three Hills Tuesday, October 9.

Miss Ilene Schmidt was hostess to a group of girls Monday evening at a pyjama party held at her home. Games were enjoyed and waffles, bacon and coffee served.

FOR SALE—6-piece custom built hardwood Breakfast Suite, \$40. Apply Morris Switzer, phone 18 or 51, Carbon. 1tc

Mrs. Art Humphrey and son, Bruce, left Friday to visit her mother at Vancouver.

HI-SCHOOL NEWS

Marjorie Leiske has departed from our ranks to take up residence at College Heights, Lacombe, where she is attending school. Marjorie will be greatly missed by her fellow students who thought a great deal of her because of her cheerful ways and always ready to help attitude. Good luck Marg, we hope you have a successful year and reach the goal you are aiming for.

Archie Gouldie has made an appearance at school. He still feels that harvesting brings in more money than schooling.

We have two newcomers at school this week — Jean Gamble in Grade VIII, and her sister, Beatrice, in Grade III. Jean and Beatrice are daughters of the new station agent and hail from Acme.

Keep your eye posted for bills announcing the coming of the coming of the Nacmine School Band and the Drumheller Male Voice Choir.

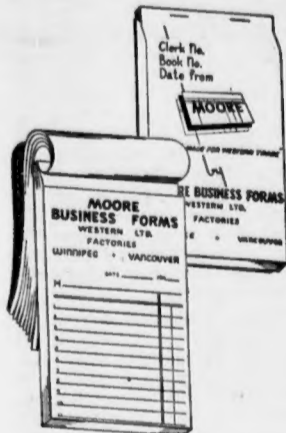

Have you had any visitors during the past week? Have you been host to any of the local organizations? We would appreciate having these news items and stories for publication. Send them in or bring them to the Carbon Chronicle office.

TIRED EYES

If the eyes are tired after being out in strong sunlight or doing close work, it often helps to wring out pads of gauze in cold water and place them on the eyes while lying down, changing when they get warm. Ten minutes of this treatment will often relieve eye fatigue.

UNWANTED HAIR

Permanently eradicated from any part of the body with Saca-Pelo, the remarkable discovery of the age. Saca-Pelo contains no drug or chemical and will kill hair root LOR-BEER LABORATORIES 679 Granville St., Vancouver, B.C.
